

Mini Dental Implants

Patient Information

Ask Me Why I'm Smiling...

I Just Had my Tooth
Replaced in One Visit!

A Simple Procedure with
Immediate Results!

Stabilize Loose Dentures in One Visit!

Imagine Smiling, Eating, and Speaking with
Confidence and Comfort Again.

Our dentist and caring staff will listen to you and develop a plan to reach your goals. You can get started on your very first visit with all the necessary x-rays and impressions. Why now? Why wait? Turn your dreams of a more comfortable and attractive smile into a beautiful reality!

Denture Retentive System

1. Your denture is fabricated as a normal denture.
2. Four or more implants are placed in one visit. The procedure requires only a few drops of local anesthesia. Each implant is placed quickly and easily. Your denture is then retro-fitted to snap on the mini implant retention heads. The mini implant system requires no extensive surgery, and with some care are ready for immediate use.
3. Laugh, smile, and speak with confidence and comfort...

Benefits of Mini's...

- Simple, gentle, non-surgical procedure
- Immediate results
- Restored confidence with speaking and eating
- Improved attractiveness of your smile
- Cost effective
- Anchoring for dentures or cemented crowns & bridges
- Preserves bone and facial structure

Why Mini Implants?

The mini dental implant procedure is a much less involved process than conventional dental implants. For this reason, the procedure can usually be completed in one simple dental appointment. In addition to saving time in the dental office, you will have far less discomfort following this procedure due to the minimally involved dental procedure (usually requiring no surgical flaps or sutures). Because the mini dental implants are so time efficient, your dentist is able to perform these procedures at a fraction of the cost associated with the larger old style dental implants.

Replace Your Missing Teeth Instantly!

Mini dental implants have been used for many years to hold denture plates in position, providing patients with the ability to eat, smile and speak with comfort and confidence. Today, use of this non-surgical mini dental implant technology has been expanded for anything from replacing a single tooth to full mouth restoration. Thousands of implants have been placed with over a 95% success rate using these cost effective procedures. The entire process consists of a consultation visit to your dentist with x-rays and impressions being taken. Then, at one treatment visit, your officially trained dentist will place the mini implant(s) in your mouth, and will position the final restoration(s). In about 30 minutes, a single tooth can be replaced without the need to grind down healthy tooth enamel. You can walk out ready to enjoy the foods you wish, without the long healing times and high costs associated with conventional implants. This same procedure can be used to replace multiple missing teeth usually in about an hour.

Simple Process

Three Easy Steps...

1. Consultation visit and pre-op*

2. Implant Placed*

3. Restoration Placed*

* These steps are all accomplished in a single short visit.
